About me

Front-End Developer with 6+ years of experience turning ideas into reliable, intuitive, and engaging digital products. I combine technical thinking, attention to detail, and a user-focused approach to solve problems and deliver high-quality solutions. Driven by continuous learning, ownership, and creating real value for users and businesses.

Work experience

2019 - 2020 | DUE-X LLC

Front-end Markup

Started my career as a Markup Developer, combining hands-on work with continuous learning. Developed responsive and well-structured web pages using HTML and CSS, while adding JavaScript interactivity and basic dynamic functionality. Gained a strong foundation in front-end development and practical experience working with web technologies.

2020 - 2025 | ZOOM GRAPHICS

Front-end markup and development

Worked as a Markup Developer and Front-End Developer, building responsive and accessible web applications using HTML, CSS, JavaScript, React, Redux, TypeScript and RESTful API. Implemented advanced CSS and GSAP animations, developed email templates, and focused on SEO and web accessibility. Used Git for version control and collaborative development.

2025 - 2026 | EPAM SYSTEMS

Software engineer

Worked as a Software Engineer on complex web applications built with Angular and TypeScript. Developed responsive UI using HTML and SCSS, while also contributing to Angular functionality and application logic. Worked on multilingual applications, addressing internationalization challenges such as RTL layouts, text expansion, and language-specific UI requirements within an Agile/Scrum environment.

Skills
